

# Precision Plastics Machining

## Precision through experience

At Apex Industries we specialize in precision plastics machining. The versatility of our capabilities and the expertise of our staff have allowed us to provide our services to some of the most demanding industries.

Industries served include - but not limited to:

- Semiconductor
- Electronics
- Industrial
- Fluid and Chemical Delivery

## Quality through capability

Our systems are engineered for flexibility and deliver tight tolerances regardless of geometrical complexity or volume.

At the heart of all of these systems, resources, and capabilities is our quality program. Within Apex Industries, quality is more than a process requirement, it's part of our culture.
